

Japan America Society of Southern California
Presents its

Sixth Annual
U.S.-Japan Green Conference

SUSTAINABLE CONSTRUCTION

The construction of sustainable buildings is an important key to using resources wisely and efficiently, as well as protecting the health of occupants and reducing waste and pollution in the environment. This year's U.S.-Japan Green Conference will focus on "green" construction, its trends and what we can expect in the future of green construction.

Please join us as our distinguished panel of experts will discuss the green construction processes that are environmentally responsible and resource-efficient throughout a building's life-cycle.

The Annual U.S.-Japan Green Conference is an official World Trade Week event that brings together professionals from a diverse group of small, medium and large-sized companies, as well as entrepreneurs and government representatives.
