

# Protecting Your Company Against CYBER ATTACKS!

If your company maintains a network, database, email addresses or online presence, you could be in jeopardy of a multitude of cyber risks. Suffering a cyber hack is a risk for all companies, small, medium and large, and for all industries. Just one incident can result in enormous losses, as well as damage your reputation.

Agents from the Federal Bureau of Investigation (FBI) and Homeland Security Investigations (HSI) will teach you how to avoid the security breaches that are proving to be more and more commonplace. These valuable insights will benefit both your company and the security of your personal computer. Learn how to best protect yourself from the hackers by understanding how they can breach and freeze your data system and put a stop to your business.

**Don't be a victim of cyberattack - minimize your exposure and maximize your cybersecurity now!**

**Wednesday, May 4, 2016**

1:00pm Registration
